EXPERIENCE

Authbridge Research and Services, Gurugram — *Associate*

OCTOBER 2019 - FEBRUARY 2021

1. Deployed the **Elastic Load Balancer** & managed scalable & highly available systems on AWS.

2. Setup a **VPC environment** & designed an effective backup strategy depending upon client requirement.

3. Played a key role in selecting **appropriate AWS services** based on data, compute, database, or security requirements.

4. Analysed **client requirements** & determined system architecture requirements to achieve business goals.

IBM, Delhi — *Software Development Intern*

MAY 2017 - JUNE 2017

1. Developed a java based application called **"La Vida Cafe"** and live it on **IBM Bluemix Server.**

2. This application helps users to order the food online.

3. There is an admin module in which the owner can add, delete or update the food items which can be viewed on the customer's module.

4. It also includes a login and logout module implemented by using sessions for each customer.
